	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Accept and validate the user's graduation year and field of interest. ● Load internship listings from a prepared CSV file. ● Filter internships by both graduation year and field. ● Display matching internships with company names and application links, or a message if no matches are found.	**Schedule - (For V2.0+)** ● Save selected internships to a favorites list. ● Sort matching internships by application deadline. ● Add filters for location and remote work.
Not Important	**Delegate - (Use a library)** ● Use Java's Scanner for terminal input. ● Use BufferedReader and FileReader for reading the CSV file. ● Use built-in String methods to remove extra spaces and compare text without case sensitivity.	**Delete - (Cut it)** ● Automatically scrape internship listings from multiple websites. ● Build a mobile app or web interface. ● Use AI to analyze resumes and recommend internships.
